

Case Study

Providing cost effective accounting services to businesses nationwide

The Workstation is a large and ever growing network of professional shared office sites for new and growing businesses.

In early 2018 Ratiobox began working with The Workstation to manage the entire finance function of the business. By having Ratiobox manage these critical elements of the business The Workstation were able to optimise their financial and accounting overheads to half of the cost of employing staff members.

Ratiobox's experienced, qualified and highly skilled accountants were able to deliver a range of professional accountancy services including monthly management accounts, VAT returns, bookkeeping, financial reporting and management of their sales and purchase ledger.

Whilst cost saving is a major factor for The Workstation, the reliability and quality of the work had to be of the highest standard. Ratiobox have continued to successfully meet these requirements by implementing and managing efficient and effective accountancy solutions with a flexible, no fuss approach.

No matter how unique or individual your business is, we deliver a personalised bespoke solution and service to match your exact needs.
